Project Name:	SentimentPulse
Team:	Team Spirit
Project Description:	For stock market traders and investors
	who need to stay informed about stock market news,
	the SentimentPulse application
	is a news aggregator and sentiment analysis tool
	that pulls in stock market news from various sources and analyzes each article's sentiment (positive, negative, or neutral) using AI.
	Unlike traditional news platforms or manual research,
	our application allows users to filter news based on sentiment, relevance, and stock symbols, helping them make faster and more informed trading decisions.
Benefit Outcomes:	Faster decision-making by filtering news based on sentiment, relevance, and stock symbols.
	Improved accuracy in evaluating stock market news with AI-driven sentiment analysis.
	Time savings by centralizing stock market news from various sources.
